

This summer a product presentation with a talk takes place on the company area of the STH-Anlagenbau GmbH.

Above all this event is directed at fire brigades and at members of the technical charitable organisation (THW), as well as at all the other rescue forces and enthusiasts.

There will be a presentation of the rescue devices of STH Anlagenbau GmbH. The cutters and hydraulic spreader, admitted for rescue, can also be tested by the participants with provided used cars.

In addition to that we were able to hire a certificated diplom-geographer who will talk about the backgrounds of the natural disasters in Chile, Haiti and Traunreut.

Everybody is welcome.

Registration please by email: kontakt@sth-anlagenbau.de

If you have questions, you can contact us any time.

We are glad about your participation!
